Warranty:

1 year on workmanship, 2 years on the generator(s) & 10 years on the bondment of the transducers.

The PROHT benchtop tanks are ultrasonic cleaning systems made of all stainless steel construction. They are available in various sizes and intended to sit easily in or on a workbench. The ultrasonic generator is provided as a separate unit and can be placed either on a shelf above or below it to conserve space. These units offer the same cleaning capabilities as the more elaborate models but at a lower price.
