## FOR IMMEDIATE RELEASE:

### CLEANING TECHNOLOGIES GROUP, LLC INTRODUCES NEW CLEANING SOLUTIONS AT CIMT

Cleaning Technologies Group, a world leader in providing cleaning and waste minimization technologies, will introduce a host of advanced cleaning solutions at the China International Machine Tool Show (CIMT) in Beijing, China April 17 - 21, 2017. Visitors to Cleaning Technologies Group Booth #W-154 will be introduced to a number of new products, technologies and services. Among the new technologies exhibited at the show will be:

- **Lean-Jet RB-2 Aqueous Immersion Cleaning System** uses a patented washing and rinsing process of agitation, spray impingement, hydraulic purging through immersion and rotation, ultrasonics, and heated blow-off drying. The patented "triple action" batch cleaning process was specifically developed to process a broad range of challenging parts, especially those with internal bores, passages and complex geometries, making this system capable of meeting critical cleaning expectations.

The Lean-Jet RB-2 parts washer also features an automation loading along with an in-line vacuum dryer.

- **Blackstone~NEY Ultrasonics Modular Aquarius Cleaning System** is an innovation in aqueous parts cleaning, offering a modular plug & play configured Multi-Tank Cleaning System. The Modular Aquarius is characterized by individual modules that can easily be integrated to offer maximum flexibility to the end user. Standard wash and rinse stages can be mated to provide the exact cleaning system required for today's application. The Modular Aquarius comes standard with three frequencies (40, 72, 104 kHz) in each tank, Siemens controller, automated hoist transfer system, and much more. Supplemental modules can be added at any time, allowing for future expandability.

- **AgiSonic® Ultrasonic Parts Washer Cleaning System** (also known as the "WashMaster & Grease Monkey Plus™") is robust line of ultrasonic cleaning systems designed for heavy duty parts washing with vertical parts agitation and up to 21 watts per gallon/5.4 watts per liter of 40 kHz ultrasonics.

The AgiSonic parts washer is so versatile; it can be found operating in the harshest industrial environment and in the most demanding medical clean rooms.

At the CIMT 2017 show, we will have technical experts available to explain our technologies more in-depth and provide suggestions to our customers to improve their cleaning processes.

*Cleaning Technologies Group, LLC is a world leader in providing innovative cleaning and waste minimization technologies to precision and industrial manufacturing markets. CTG is comprised of Ransohoff located in Cincinnati, Ohio, Blackstone-NEY Ultrasonics located in Jamestown, New York, and CTG Asia located in Suzhou, China. The Group is the premier provider of high technology, environmentally friendly parts-cleaning and waste-minimization equipment and services to the global marketplace. CTG LLC is a wholly owned subsidiary of NM Group Global, LLC.*

*NM Group Global LLC is a holding company for a growing group of manufacturing firms with a global reach for sourcing and marketing. Founded in 2002 with the purchase of National Machinery LLC, the original holding company, and world leader in the development and manufacture of cold forming machines, process technology, and aftermarket services. National Machinery, founded in 1874, is headquartered in Tiffin, Ohio with service centers and sales offices throughout the world.*
