## FOR IMMEDIATE RELEASE:

### Ransohoff Introduces the New Generation Lean-Jet® RB-1 Parts Washer.

March 2015 – Cincinnati, OH

Ransohoff, a division of Cleaning Technologies Group LLC, is proud to introduce its new generation Lean-Jet® RB-1 Gen 3 immersion cleaning system. The New Lean-Jet® RB-1 Cleaning System uses a patented washing and rinsing process of agitation, spray impingement, hydraulic purging through immersion and rotation, ultrasonics, and heated blow-off drying. The patented "triple action" batch cleaning process was developed specifically to process a broad range of challenging parts, especially those with internal bores and passages and complex geometries, making this system capable of meeting critical cleaning expectations.

The new Lean-Jet RB-1 Gen 3 parts washer also features the latest Siemens programmable controller and operator interface screen. This controls platform boosts system flexibility for automation integration, process control and data logging while offering an intuitive user interface. The new RB-1 has many enhancements for easy maintenance such as larger access doors, larger tank access lids, bolt on air knife and more. The new RB-1 has a small foot print of 4ft. wide x 7ft. deep x 6.6 ft. height.
